1 INTRODUCTION

This is the *Pakenham East Native Vegetation Precinct Plan* (NVPP) listed under the Schedule to Clause 52.16 of the *Cardinia Planning Scheme*. This NVPP includes the information required under Section 10 of *Guidelines for the removal, destruction or lopping of native vegetation* (Guidelines) (DELWP 2017a). The Guidelines state that an NVPP prepared for incorporation into the planning scheme must:

- Specify the purpose and objectives of the plan;
- Specify the area to which the NVPP applies;
- Map and describe the native vegetation that can be removed, destroyed or lopped;
- Map and describe the native vegetation to be retained;
- Set out the offset requirement, determined in accordance with the Guidelines;
- Specify management responsibilities and actions for native vegetation to be retained; and,
- Provide an offset statement that includes evidence that an offset that meets offset requirements for the removal of native vegetation is available and explains how it will be secured in accordance with the Guidelines. This statement must also include procedures regarding how the offset will be secured should the offsets be divided amongst multiple properties or parties.

The Guidelines also state that an NVPP must include mechanisms for tracking the removal of native vegetation and corresponding securing of offsets, to ensure that this occurs in accordance with the NVPP.

The removal, destruction or lopping of native vegetation in accordance with this NVPP, does not require a planning permit provided conditions and requirements specified in this NVPP are met.

If native vegetation is proposed to be removed, destroyed or lopped not in accordance with this NVPP, a planning permit to remove native vegetation is required under Clause 52.16 of the *Cardinia Planning Scheme*. In this circumstance, an application for a permit must comply with the application requirements specified in the Guidelines. An application to remove native vegetation not in accordance with this incorporated NVPP must be supported by current site information, as per *Assessor's handbook – applications to remove, destroy or lop native vegetation* (Assessor's handbook) (DELWP 2017b). In this plan the term 'remove native vegetation' includes to destroy and/or to lop native vegetation.

1.1 Purpose of the NVPP

The purpose of the *Pakenham East NVPP* is to:

- Summarise the biodiversity values across the precinct;
- Apply a holistic, landscape wide approach to retention and removal of native vegetation across the precinct (Figure 1);
- Ensure that areas retained for the protection of native vegetation are managed to conserve ecological values in accordance with the *Pakenham East Precinct Structure Plan* (PSP);

- Ensure that the removal, destruction or lopping of native vegetation, and the management of the native vegetation specified to be retained is consistent with conserving the ecological values of these areas, and is in accordance with no net loss objective of the Guidelines;
- Describe the offset requirements for any permitted removal, destruction or lopping of native vegetation as identified in this plan; and,
- Streamline the planning approvals process through a landscape approach to native vegetation protection and management.

1.2 Vegetation Protection Objectives to be Achieved

The objectives of the *Pakenham East NVPP* are to:

- Ensure there is no net loss to biodiversity as a result of the approved removal, destruction or lopping of native vegetation. This is achieved by applying the three-step approach in accordance with Clause 12.01-2S Native vegetation management, Clause 52.16 and the Guidelines;
- Apply a landscape approach to the management of native vegetation within the NVPP area, in accordance with Clause 12.01-1S Protection of biodiversity;
- Manage native vegetation to be retained in accordance with obligations under the *Catchment and Land Protection Act 1994*;
- Ensure that areas set aside to protect native vegetation are managed to conserve biodiversity and other values in accordance with the *Pakenham East PSP*;
- Ensure that the Tree Protection Zones of trees within patches and scattered trees are protected in accordance with *Australian Standard AS4790-2009*;
- Provide for the long-term preservation of the flora and fauna, and associated habitat of environmentally significant areas;
- Protect and enhance remnant native vegetation and associated habitats (wildlife corridors) along Deep Creek, the Princess Highway and in the vicinity of Carty Lane;
- Establish additional habitat corridors and stepping stones (patches of native vegetation) along Hancocks Gully, newly created wetlands, drainage corridors and hilltop reserves; and,
- Support the provision of Public Open Space (POS) and dedicated conservation areas that avoid vegetation loss, minimise impacts, and enhance native vegetation.
- Manage impacts on protected native vegetation from recreational facilities and infrastructure.

2 AREA TO WHICH THE NVPP APPLIES

The *Pakenham East NVPP* applies to land within the NVPP Area shown on Figure 1.

The properties included within the area to which this NVPP applies are provided below (Table 1). Property ID numbers in Figure 2 correspond to those listed in Table 1.

The NVPP applies to approximately 630 hectares of residential and agricultural land and is bound to the west by Deep Creek and Ryan Road, to the east by Mount Ararat Road North and Mount Ararat Road South, to the south by the Princes Freeway (Pakenham Bypass) and to the north by an electricity transmission line easement. The NVPP is located approximately 60 kilometres south-east of Melbourne's Central Business District and covers the suburbs of Pakenham, Nar Nar Goon and Nar Nar Goon North.

Remnant vegetation within the NVPP is representative of seven Ecological Vegetation Communities (EVCs) within the Gippsland Plain and Highlands – Southern Fall bioregions. The following EVCs were recorded: Riparian Forest (EVC 18), Swampy Riparian Woodland (EVC 83), Grassy Forest (EVC 128), Grassy Woodland (EVC 175), Damp Heathy Woodland (EVC 793), Swampy Woodland (EVC 937) and Swamp Scrub (EVC 53). A total of 505 scattered trees were recorded within the NVPP. The habitat zones and scattered trees included for retention within the precinct have been identified as containing remnant native vegetation and providing potential habitat for threatened flora and fauna. It is important that these areas are retained and managed to ensure that their biodiversity values and habitat links are protected and enhanced.

The Commonwealth has determined that the rezoning of the precinct in accordance with the *Pakenham East PSP* is not considered a 'controlled action' under the *Environment Protection and Biodiversity Conservation Act 1999* (EPBC Act). This means that the proposed future development of the PSP does not require further assessment and approval under the EPBC Act.

Table 1 Land included within the area to which this NVPP applies

3 NATIVE VEGETATION TO BE REMOVED

3.1 Assessment Pathway

The assessment pathway for native vegetation that can be removed (including the reason for the assessment pathway) is described in the *Native vegetation removal report EHP_2018_239* (Appendix 1) and Table 2.

Table 2 Assessment pathway and reason for the assessment pathway

Assessment pathway	Detailed
Extent including past and proposed	13.086 hectares
Extent of past removal	0.000 hectares
Extent of proposed removal	13.086 hectares
No. Large trees proposed to be removed	111
Location category	Location 2: The native vegetation is in an area mapped as an endangered Ecological Vegetation Class, Removal of less than 0.5 hectares of native vegetation in this location will not have a significant impact on any habitat for a rare or threatened species.

3.2 Description of Native Vegetation to be Removed

The following native vegetation can be removed, destroyed or lopped without a planning permit, subject to the requirements and conditions set out in this NVPP:

- Native vegetation described in Table 3 and Table 4 and shown in Figure 2 to this NVPP; and,
- Native vegetation that does not qualify as a patch of native vegetation or a scattered tree.

For native vegetation that regenerates following approval of this NVPP, and all other native vegetation in the NVPP area that is not identified as ‘to be retained’, advice should be sought from the relevant Responsible Authority as to whether a permit is required for its removal, destruction or lopping.

Habitat zone and tree labels in Table 3 and Table 4 correspond to habitat zone and tree labels in Figure 2a-n.

* This is a large tree within a patch of native vegetation (exact diameter not recorded).

Note: LPT = Large tree within a patch of native vegetation, LST = Large scattered tree, SST = Small scattered tree. The EVC benchmark DBH of a large tree is 80cm for *Eucalyptus* spp. and 40cm Black Sheoak.

4 NATIVE VEGETATION OFFSETS

4.1 Offset Requirement for Native Vegetation to be Removed

The offset requirements for native vegetation that can be removed are described in the *Native vegetation removal report (EHP_2018_239)* and Table 5.

The offset requirements divided amongst multiple properties or parties are outlined below (Table 6).

Table 5 Total offset requirements for NVPP area

General Offsets Required	3.068 GHUs
Species Offsets Required	N/A
Vicinity (catchment / LGA)	Port Philip and Westernport CMA / Cardinia Shire Council
Minimum Strategic Biodiversity Value Score	0.356
Large Trees	111

4.2 Offset Statement

4.2.1 Statement

The required offsets must be secured before the native vegetation can be removed, destroyed or lopped. The individual or organisation proposing to remove, lop or destroy native vegetation identified for removal in this NVPP is responsible for ensuring that the required offsets (i.e. General Habitat Units) have been secured prior to any permitted clearing. The provision of offsets must accord with the permit conditions, and the conditions provided in Section 6 of this NVPP. The individual or organisation may deliver a first party offset or purchase a native vegetation credit from a third party. In both circumstances the offset will need to be, as a priority, be located within the Cardinia Shire Council municipal boundary, unless otherwise agreed with the responsible authority. If the required offsets are not able to be met within Cardinia Shire Council, they must be met within the Port Phillip and Westernport Catchment Management Authority area.

The Department of Environment, Land, Water and Planning (DELWP) confirmed in September 2018 that there are currently over 200 General Habitat Units (GHUs) in the Port Phillip and Western Port CMA and 4 GHUs within Cardinia Shire Council available for trading or allocation. This confirms there are currently sufficient GHUs listed on the Native Vegetation Credit Register to meet offset requirements for the removal of native vegetation in the Pakenham East precinct. To date, these offsets have not been secured.

An individual or organisation can meet their offset obligations by:

- Securing a third party offset through the purchase of native vegetation credits from the Native Vegetation Credit Register via an accredited broker;
- Establishing a new offset site, agreed to by a third party; or,
- If eligible, establishing a first-party offset site on their own land which is then registered on the Native Vegetation Offset Register.

Modelled native vegetation (DELWP 2005 extant native vegetation layer) across private properties within the Cardinia Shire Council (north of Pakenham) that are potentially suitable to generate biodiversity credits through the registration of GHU on the Native Vegetation Credit Register is shown in Figure 3.

4.2.2 Collection of Payments

Any offset costs are to be paid by the individual or organisation who propose to remove, lop or destroy the native vegetation identified for removal as part of the NVPP.

5 NATIVE VEGETATION TO BE RETAINED

5.1 Description of Native Vegetation to be Retained

Native vegetation to be retained is described in Table 7 and Table 8 and shown in Figure 2 to this NVPP.

Habitat zone and tree labels in Table 7 and Table 8 correspond to habitat zone and tree labels shown in Figure 2a-n.

Native vegetation identified in this NVPP as ‘to be retained’ has been identified following a strategic approach to retaining native vegetation with greater biodiversity, arboricultural, landscape or other value. Any future removal of native vegetation that has been identified as ‘to be retained’ will undermine the strategic approach adopted for the preparation of this NVPP.

Table 7 Native vegetation to be retained

* This is a large tree within a patch of native vegetation (exact diameter not recorded).

Note: LPT = Large tree within a patch of native vegetation, LST = Large scattered tree, SST = Small scattered tree. The EVC benchmark DBH of a large tree is 80cm for *Eucalyptus* spp. and 40cm Black Sheoak.

5.2 Management Responsibilities and Actions

5.2.1 Native Vegetation to be Retained

Any vegetation offsets desired to be achieved within retained vegetation must meet the eligibility requirements of the *Native vegetation gain scoring manual*. Specific management responsibilities and actions apply to areas of native vegetation to be retained that will also be protected as an on-site offset. These areas will be managed in accordance with the offset site management plan.

The table below details the responsibility, objectives and values of the native vegetation that is to be retained in local parks, drainage infrastructure, local sports reserves, the Carty Lane conservation area and the Princes Highway corridor.

Of all the trees to be retained, 21 are located outside the aforementioned locations (Tree Numbers 1, 2, 3, 4, 47, 109, 110, 111, 112, 128, 129, 149, 170, 332, 333, 338, 350, 353, 354, 374, 389). These trees will be the responsibility of Cardinia Shire Council, where located in public land. They should be located within the road reserve network and their retention is dependent on detailed design. These trees

should be retained wherever possible for their landscape values, however, permits for their removal should take their location outside of open space into consideration.

Table 9 Management responsibilities and actions

Area	Ultimate Responsibility	Objectives	Values
LP-04	Cardinia Shire Council	Local park (Neighbourhood Park)	Largely unencumbered open space featuring retained scattered trees
LP-05	Cardinia Shire Council	Local park (Neighbourhood Park)	Largely unencumbered open space featuring retained native vegetation
LP-09	Cardinia Shire Council	Local park (Neighbourhood Park)	Largely unencumbered open space featuring scattered tree
LP-13	Cardinia Shire Council	Local park (Neighbourhood Park)	Largely unencumbered open space featuring retained native vegetation
SR-01	Cardinia Shire Council	Local sports Reserve and associated pavilion	Active open space with retained trees
WI-03	Cardinia Shire Council and Melbourne Water*	Constructed waterway	Water infrastructure featuring retained dead stags
WI-05	Cardinia Shire Council and Melbourne Water*	Stormwater quality treatment & drainage asset	Water infrastructure featuring retained native vegetation
WI-06	Cardinia Shire Council and Melbourne Water*	Natural waterway corridor – Deep Creek reserve	Natural waterway featuring retained trees and vegetation
LC-01	Cardinia Shire	Conservation area	Conservation area protecting native vegetation
Princes Highway	VicRoads	Primary arterial road	Highway corridor featuring retained native vegetation

* Melbourne Water will be responsible for managing vegetation within the 1 in 100-year flood level and/or vegetation located up to 10 metres from any recreational assets including shared paths.

See Appendix 2 for the identification and location of the areas in the table above.

6 CONDITIONS FOR REMOVAL OF NATIVE VEGETATION

The native vegetation identified in Table 3 and 4 and shown in Figure 2 to this NVPP can be removed, destroyed or lopped without a planning permit as allowed under Clause 52.16, subject to the following conditions:

- The removal, destruction or lopping of native vegetation must be in accordance with this NVPP. Only the native vegetation that is identified for removal in this NVPP may be removed, destroyed or lopped.
- Prior to the removal of any native vegetation, a statement of intention to remove native vegetation must be provided to the satisfaction of the Responsible Authority. The statement must include:
 - The reason for the native vegetation removal.
 - Evidence that an offset has been secured. The offset must meet the offset requirements provided in this NVPP and delivered in accordance with the requirements of *Guidelines for the removal, destruction or lopping of native vegetation* (DELWP 2017a). Offset evidence can be:
 - A security agreement (signed by both parties) to the required standard for the offset site or sites, including a 10-year Offset Management Plan; or
 - An allocated credit extract from the *Native Vegetation Credit Register*.
- Prior to the removal of any native vegetation, or prior to the commencement of works, all native vegetation identified in this NVPP as to be retained must be protected by high visibility fencing, as follows:
 - Fencing around scattered trees and trees within patches of native vegetation must meet the minimum standards for a tree protection zone described in AS 4970-2009 Protection of trees on development sites or succeeding Australian Standard.
 - Fencing around patches of native vegetation must be erected at a minimum distance of 2 metres from the retained native vegetation.
 - The area within the tree protection zone must be mulched for the duration of construction works. Mulch must be laid to a minimum of depth of 2.5cm.
 - Fencing shall not be removed until such works are completed.
- Except with the written consent of the Responsible Authority, within the native vegetation protection areas:
 - No vehicular or pedestrian access, trenching or soil excavation is to occur;
 - No storage or dumping of tools, equipment, vehicles, fill or waste is to occur; and
 - No entry and exit pits for underground services are to be constructed.

- Prior to felling of any tree which may be removed, the tree must be examined by a suitably qualified zoologist for the presence of fauna in hollows or external nests. Whenever possible tree removal should not occur during spring and early summer to avoid disturbing active nests. If native fauna species are located, they must be salvaged and relocated to the closest suitable vegetation, in consultation with DELWP and the Responsible Authority.
- All indigenous trees permitted to be removed must be relocated into protected conservation areas within the NVPP or a nearby conservation reserve for inclusion as large logs, in consultation with DELWP and the Responsible Authority. These logs must be cut into a minimum of 1.5 metre lengths and placed into the conservation areas under the direction of a suitably qualified ecologist, with the written consent of the Responsible Authority.
- Fill and machinery associated with construction must be placed at least 30 metres away from areas supporting native vegetation and drainage lines, or to the satisfaction of the Responsible Authority.
- Prior to the removal of native vegetation the Responsible Authority and/or DELWP must be given an opportunity to salvage genetic material from flora species for use in nearby Public Reserves.
- All earthworks must be undertaken in a manner that will minimise soil erosion and adhere to *Construction Techniques for Sediment Pollution Control* (EPA 1991).
- Water run-off must be designed to ensure that native vegetation to be retained is not compromised.

The following condition must be included on any subdivision permit:

- Prior to the [insert appropriate timeframe: the beginning of any works authorised by this permit / certification of the plan of subdivision / other timeframe as appropriate] a statement of intention must be provided to the satisfaction of the Responsible Authority. The statement must include:
 - The purpose of the subdivision.
 - Evidence that an offset has been secured. The offset must meet the offset requirements set out in this NVPP and delivered in accordance with the requirements of *Guidelines for the removal, destruction or lopping of native vegetation*. Offset evidence can be:
 - A security agreement (signed by both parties) to the required standard for the offset site or sites, including a 10-year Offset Management Plan; or
 - An allocated credit extract from the Native Vegetation Credit Register.

APPENDICES

Appendix 1 - Native Vegetation Removal (NVR) Report, DELWP

Native vegetation removal report

This report provides information to support an application to remove, destroy or lop native vegetation in accordance with the *Guidelines for the removal, destruction or lopping of native vegetation*. The report is **not an assessment by DELWP** of the proposed native vegetation removal. Native vegetation information and offset requirements have been determined using spatial data provided by the applicant or their consultant.

Date of issue: 02/10/2018

Report ID: EHP_2018_239

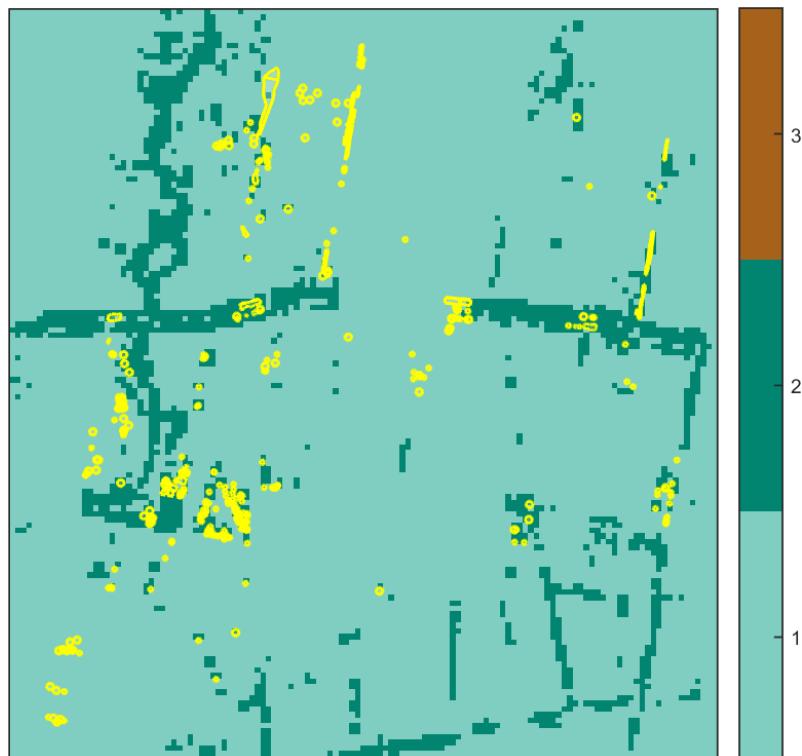

Time of issue: 12:47 pm

Project ID	EHP10861_PakenhamE_NVPP
------------	-------------------------

Assessment pathway

Assessment pathway	Detailed Assessment Pathway
Extent including past and proposed	13.086 ha
Extent of past removal	0.000 ha
Extent of proposed removal	13.086 ha
No. Large trees proposed to be removed	111
Location category of proposed removal	Location 2 The native vegetation is in an area mapped as an endangered Ecological Vegetation Class (as per the statewide EVC map). Removal of less than 0.5 hectares of native vegetation in this location will not have a significant impact on any habitat for a rare or threatened species.

Land, Water
and Planning

Native vegetation removal report

Offset requirements if a permit is granted for whole project

Any approval granted will include a condition to obtain an offset that meets the following requirements:

General offset amount¹	3.068 general habitat units
Vicinity	Port Phillip and Westernport Catchment Management Authority (CMA) or Cardinia Shire Council
Minimum strategic biodiversity value score ²	0.356
Large trees	111 large trees

NB: values within tables in this document may not add to the totals shown above due to rounding

Appendix 1 includes information about the native vegetation to be removed

Appendix 2 includes information about the rare or threatened species mapped at the site.

Appendix 3 includes maps showing native vegetation to be removed and extracts of relevant species habitat importance maps

¹ The general offset amount required is the sum of all general habitat units in Appendix 1.

² Minimum strategic biodiversity score is 80 per cent of the weighted average score across habitat zones where a general offset is required

Native vegetation removal report

Offset requirements if a permit is granted per property

Any approval granted will include a condition to obtain an offset that meets the following offset requirements:

Native vegetation removal report

Next steps

Any proposal to remove native vegetation must meet the application requirements of the Detailed Assessment Pathway and it will be assessed under the Detailed Assessment Pathway.

If you wish to remove the mapped native vegetation you are required to apply for a permit from your local council. Council will refer your application to DELWP for assessment, as required. **This report is not a referral assessment by DELWP.**

This *Native vegetation removal report* must be submitted with your application for a permit to remove, destroy or lop native vegetation.

Refer to the *Guidelines for the removal, destruction or lopping of native vegetation* (the Guidelines) for a full list of application requirements. This report provides information that meets the following application requirements:

- The assessment pathway and reason for the assessment pathway
- A description of the native vegetation to be removed (partly met)
- Maps showing the native vegetation and property (partly met)
- Information about the impacts on rare or threatened species.
- The offset requirements determined in accordance with section 5 of the Guidelines that apply if approval is granted to remove native vegetation.

Additional application requirements must be met including:

- Topographical and land information
- Recent dated photographs
- Details of past native vegetation removal
- An avoid and minimise statement
- A copy of any Property Vegetation Plan that applies
- A defendable space statement as applicable
- A statement about the Native Vegetation Precinct Plan as applicable
- A site assessment report including a habitat hectare assessment of any patches of native vegetation and details of trees
- An offset statement that explains that an offset has been identified and how it will be secured.

Disclaimer

This publication may be of assistance to you but the State of Victoria and its employees do not guarantee that the publication is without flaw of any kind or is wholly appropriate for your particular purposes and therefore disclaims all liability for any error, loss or other consequence which may arise from you relying on any information in this publication.

Obtaining this publication does not guarantee that an application will meet the requirements of Clauses 52.16 or 52.17 of the Victoria Planning Provisions and Victorian planning schemes or that a permit to remove native vegetation will be granted.

Notwithstanding anything else contained in this publication, you must ensure that you comply with all relevant laws, legislation, awards or orders and that you obtain and comply with all permits, approvals and the like that affect, are applicable or are necessary to undertake any action to remove, lop or destroy or otherwise deal with any native vegetation or that apply to matters within the scope of Clauses 52.16 or 52.17 of the Victoria Planning Provisions and Victorian planning schemes.

Appendix 1: Description of native vegetation to be removed

The species-general offset test was applied to your proposal. This test determines if the proposed removal of native vegetation has a proportional impact on any rare or threatened species habitats above the species offset threshold. The threshold is set at 0.005 per cent of the mapped habitat value for a species. When the proportional impact is above the species offset threshold a species offset is required. This test is done for all species mapped at the site. Multiple species offsets will be required if the species offset threshold is exceeded for multiple species.

Where a zone requires species offset(s), the species habitat units for each species in that zone is calculated by the following equation in accordance with the Guidelines:

$$\text{Species habitat units} = \text{extent} \times \text{condition} \times \text{species landscape factor} \times 2, \text{ where the species landscape factor} = 0.5 + (\text{habitat importance score}/2)$$

The species offset amount(s) required is the sum of all species habitat units per zone

Where a zone does not require a species offset, the general habitat units in that zone is calculated by the following equation in accordance with the Guidelines:

$$\text{General habitat units} = \text{extent} \times \text{condition} \times \text{general landscape factor} \times 1.5, \text{ where the general landscape factor} = 0.5 + (\text{strategic biodiversity value score}/2)$$

The general offset amount required is the sum of all general habitat units per zone.

Native vegetation to be removed

Appendix 2: Information about impacts to rare or threatened species' habitats on site

This table lists all rare or threatened species' habitats mapped at the site.

Species common name	Species scientific name	Species number	Conservation status	Group	Habitat impacted	% habitat value affected
Strzelecki Gum	<i>Eucalyptus strzeleckii</i>	504558	Vulnerable	Dispersed	Habitat importance map	0.0012
Dandenong Wattle	<i>Acacia stictophylla</i>	505140	Rare	Dispersed	Habitat importance map	0.0004
Grey Billy-buttons	<i>Craspedia canens</i>	504643	Endangered	Dispersed	Habitat importance map	0.0004
Green Scentbark	<i>Eucalyptus fulgens</i>	505175	Rare	Dispersed	Habitat importance map	0.0004
Australian Grayling	<i>Prototroctes maraena</i>	4686	Vulnerable	Dispersed	Habitat importance map	0.0003
Brickmaker's Sedge	<i>Gahnia grandis</i>	501390	Vulnerable	Dispersed	Habitat importance map	0.0002
Growling Grass Frog	<i>Litoria raniformis</i>	13207	Endangered	Dispersed	Habitat importance map ; special site	0.0002
Swamp Fireweed	<i>Senecio psilocarpus</i>	504659	Vulnerable	Dispersed	Habitat importance map	0.0002
Floodplain Fireweed	<i>Senecio campylocarpus</i>	507136	Rare	Dispersed	Habitat importance map	0.0002
Winter Sun-orchid	<i>Thelymitra hiemalis</i>	505006	Endangered	Dispersed	Habitat importance map	0.0002
Maroon Leek-orchid	<i>Prasophyllum frenchii</i>	502709	Endangered	Dispersed	Habitat importance map	0.0002
Spurred Helmet-orchid	<i>Corybas aconitiflorus</i>	500835	Rare	Dispersed	Habitat importance map	0.0002
Hoary Rapier-sedge	<i>Lepidosperma canescens</i>	501915	Rare	Dispersed	Habitat importance map	0.0002
Plains Yam-daisy	<i>Microseris scapigera s.s.</i>	504657	Vulnerable	Dispersed	Habitat importance map	0.0001
Matted Flax-lily	<i>Dianella amoena</i>	505084	Endangered	Dispersed	Habitat importance map	0.0001
Swamp Everlasting	<i>Xerochrysum palustre</i>	503763	Vulnerable	Dispersed	Habitat importance map	0.0001
Glossy Grass Skink	<i>Pseudemoia rawlinsoni</i>	12683	Vulnerable	Dispersed	Habitat importance map	0.0001
Lewin's Rail	<i>Lewinia pectoralis pectoralis</i>	10045	Vulnerable	Dispersed	Habitat importance map	0.0001
Rough Daisy-bush	<i>Olearia asterotricha</i>	502300	Rare	Dispersed	Habitat importance map	0.0001

Purple Blown-grass	<i>Lachnagrostis punicea</i> subsp. <i>punicea</i>	504206	Rare	Dispersed	Habitat importance map	0.0001
Wiry Bossiaea	<i>Bossiaea cordigera</i>	500435	Rare	Dispersed	Habitat importance map	0.0001
Swamp Skink	<i>Lissolepis coventryi</i>	12407	Vulnerable	Dispersed	Habitat importance map	0.0001
Pale Swamp Everlasting	<i>Coronidium gunnianum</i>	504655	Vulnerable	Dispersed	Habitat importance map	0.0001
Purple Diuris	<i>Diuris punctata</i>	501084	Vulnerable	Dispersed	Habitat importance map	0.0001
Purple Blown-grass	<i>Lachnagrostis punicea</i> subsp. <i>filifolia</i>	504222	Rare	Dispersed	Habitat importance map	0.0001
Parsley Xanthosia	<i>Xanthosia leiophylla</i>	504562	Rare	Dispersed	Habitat importance map	0.0001
Tufted Club-sedge	<i>Isolepis wakefieldiana</i>	501789	Rare	Dispersed	Habitat importance map	0.0001
Cobra Greenhood	<i>Pterostylis grandiflora</i>	502798	Rare	Dispersed	Habitat importance map	0.0001
Grey Goshawk	<i>Accipiter novaehollandiae</i> novaehollandiae	10220	Vulnerable	Dispersed	Habitat importance map	0.0000
Yarra Gum	<i>Eucalyptus yarraensis</i>	501326	Rare	Dispersed	Habitat importance map	0.0000
Swamp Bush-pea	<i>Pultenaea weindorferi</i>	502881	Rare	Dispersed	Habitat importance map	0.0000
Green-striped Greenhood	<i>Pterostylis chlorogramma</i>	504728	Vulnerable	Dispersed	Habitat importance map	0.0000
Slender Stylewort	<i>Levenhookia sonderi</i>	501998	Rare	Dispersed	Habitat importance map	0.0000
Masked Owl	<i>Tyto novaehollandiae</i> novaehollandiae	10250	Endangered	Dispersed	Habitat importance map	0.0000
Tremont Bundy	<i>Eucalyptus aff. goniocalyx</i> (Dandenong Ranges)	507008	Vulnerable	Dispersed	Habitat importance map	0.0000
Black Falcon	<i>Falco subniger</i>	10238	Vulnerable	Dispersed	Habitat importance map	0.0000
Wine-lipped Spider-orchid	<i>Caladenia oenochila</i>	503694	Vulnerable	Dispersed	Habitat importance map	0.0000
Australasian Shoveler	<i>Anas rhynchos</i>	10212	Vulnerable	Dispersed	Habitat importance map	0.0000
Austral Crane's-bill	<i>Geranium solanderi</i> var. <i>solanderi</i> s.s.	505337	Vulnerable	Dispersed	Habitat importance map	0.0000
Velvet Apple-berry	<i>Billardiera scandens</i> s.s.	504290	Rare	Dispersed	Habitat importance map	0.0000
Arching Flax-lily	<i>Dianella</i> sp. aff. <i>longifolia</i> (Benambra)	505560	Vulnerable	Dispersed	Habitat importance map	0.0000

White-throated Needletail	<i>Hirundapus caudacutus</i>	10334	Vulnerable	Dispersed	Habitat importance map	0.0000
Hardhead	<i>Aythya australis</i>	10215	Vulnerable	Dispersed	Habitat importance map	0.0000
Forest Phebalium	<i>Phebalium squamulosum</i> subsp. <i>squamulosum</i>	504817	Rare	Dispersed	Habitat importance map	0.0000
Clover Glycine	<i>Glycine latrobeana</i>	501456	Vulnerable	Dispersed	Habitat importance map	0.0000

Habitat group

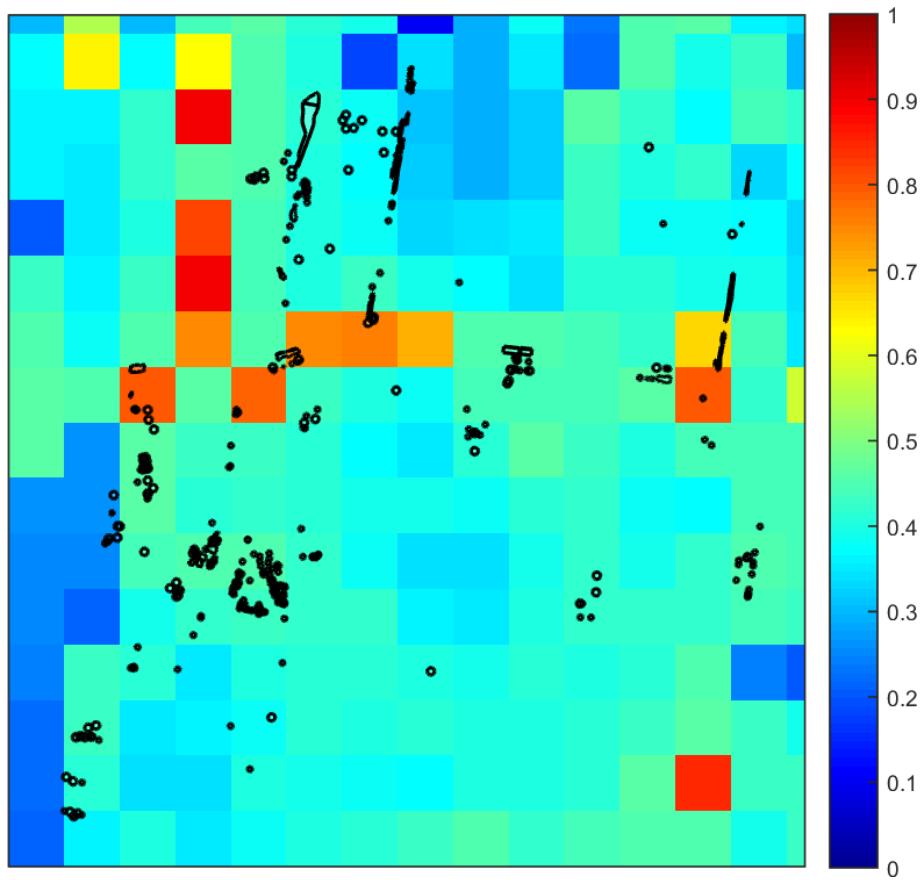

- Highly localised habitat means there is 2000 hectares or less mapped habitat for the species
- Dispersed habitat means there is more than 2000 hectares of mapped habitat for the species

Habitat impacted

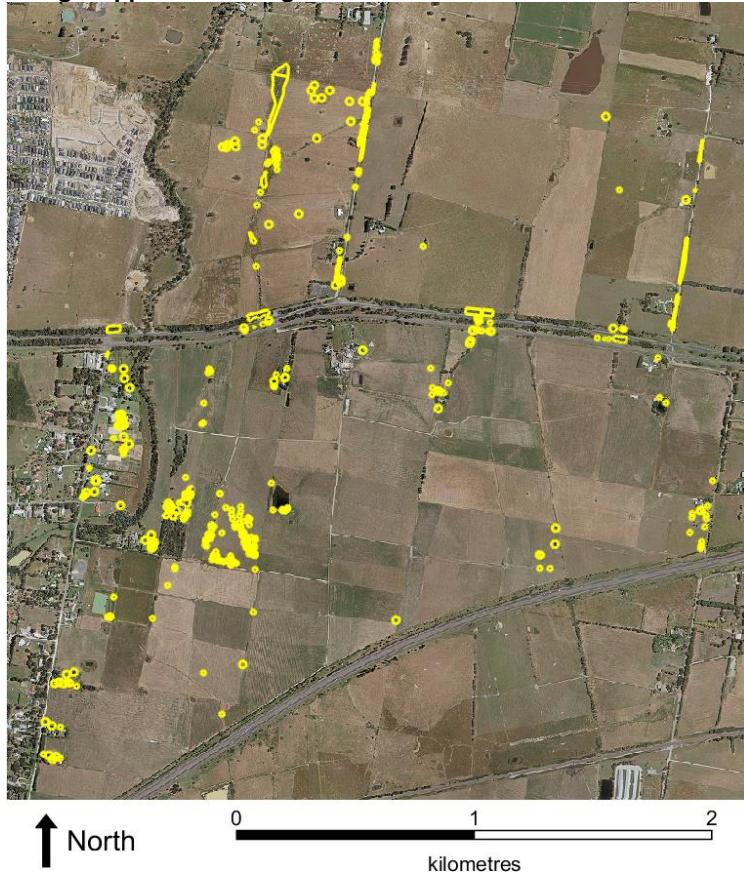

- Habitat importance maps are the maps defined in the Guidelines that include all the mapped habitat for a rare or threatened species
- Top ranking maps are the maps defined in the Guidelines that depict the important areas of a dispersed species habitat, developed from the highest habitat importance scores in dispersed species habitat maps and selected VBA records
- Selected VBA record is an area in Victoria that represents a large population, roosting or breeding site etc.

Appendix 3 – Images of mapped native vegetation

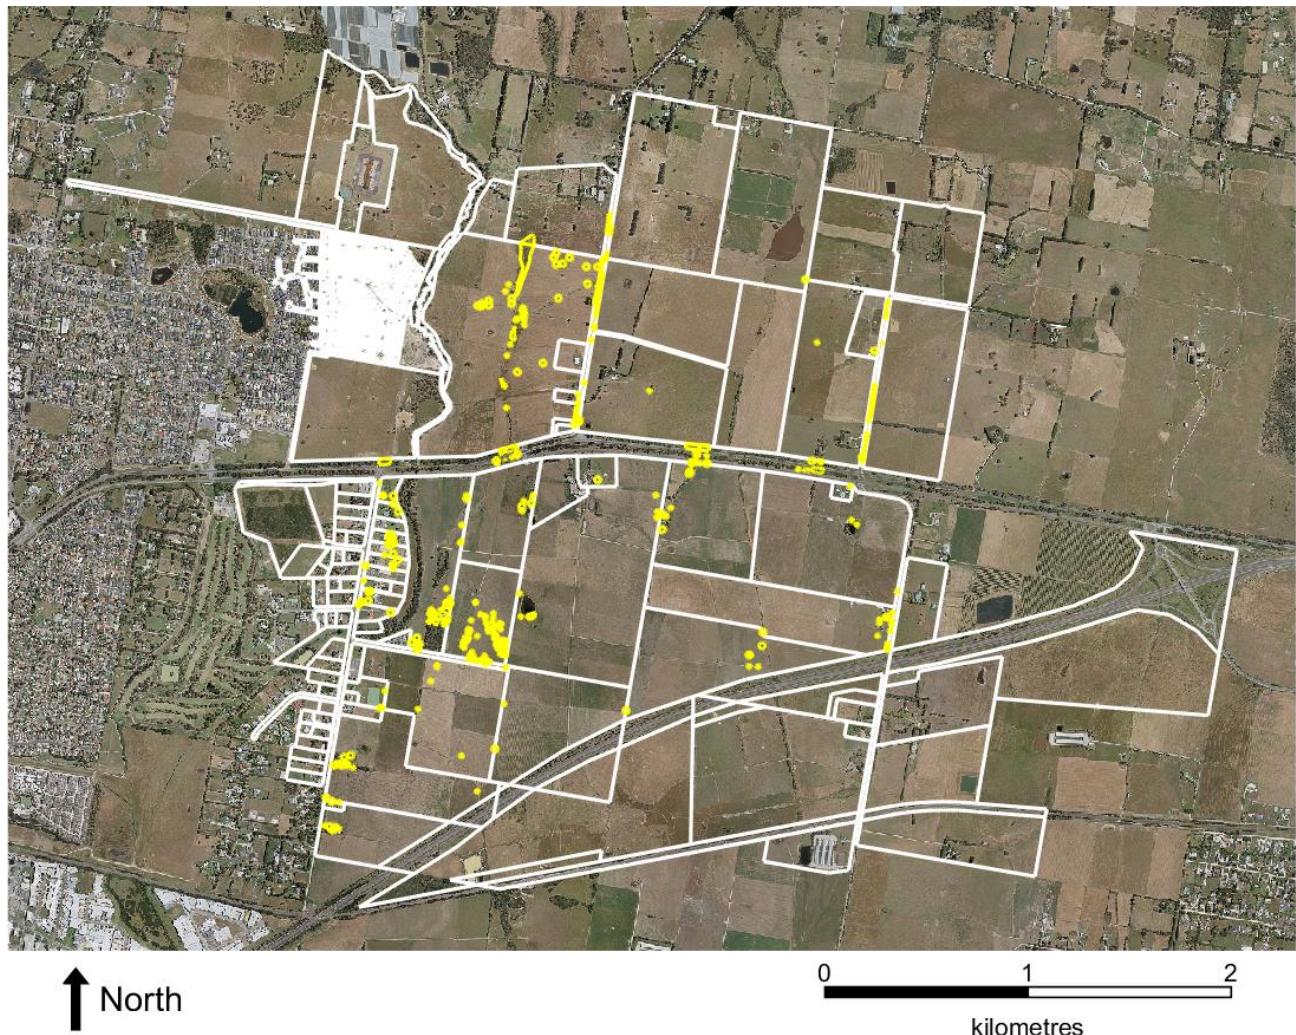

2. Strategic biodiversity values map

3. Aerial photograph showing mapped native vegetation

4. Map of the property in context

Yellow boundaries denote areas of proposed native vegetation removal.
