**DESIGN SUMMARY**  
The new skatepark has been designed to capture the Top 5 Skate Elements that were chosen during the community consultation process and the overall design also takes into consideration the Top 5 Plaza Elements to complete the list.

Alongside these Top 5's, the available budget has allowed for further inclusions to make sure beginner, intermediate and advanced riders are catered for with a wide variety of heights, angles and elements.

The whole space has been designed to work with the existing landform, create clear and open entry points and importantly, provide elements that do not exist in the surrounding skateparks to further enhance the diversity of terrain in the broader area.
