

RECOMMENDED DIRECTION:

‘ABSTRACT SPORTS STARS’

ARTISTIC VISION

The Comely Bank Pavilion is craving a modern artistic touch. One that not only pays homage to the geometric shapes made up of pastel green and yellow ceramic-glazed walls finished off with the detailing of protruding brickwork.

There’s plenty of areas for us to work with here, but it’s about strategic placement that will help bring the Pavilion to life. The main wall near the entrance and garden bed is the most obvious and a must, but we’d love to propose running our theme through the entire building where applicable. We’re thinking not one wall, but one hero piece that then continues the story across multiple walls and viewpoints.

As the title suggests, we’ll feature multiple sports people of all demographics, tangled in the flowing type ‘Comely’ to help “sign-off” the wall as the local communities very own.

REFERENCE

Simplicity meets style. Using solid geometric shapes and abstract figures we can keep the design contemporary, avoiding anything too literal which can lack the energy the pavilion is craving. Using solid colours also allows for application on most surfaces, crucial with the structure's producing brickwork.
